PRINT CARD

3D Printing: Make Something Real

Two pages about your two prints: your words on this page, your screenshots and photos on the next. Fill in every box, then turn it in as a PDF or clear photos, along with Print 2's STL file.

Nickname or initials	Section	Printer	Date
	MS / HS	Formlabs / MakerBot	

Print 1 The model you found: its name, the page link, and the designer's name.	
Print 2: what it is Keep it simple, level up, or fix a problem, and why. Fixing a problem? Who it is for.	
Measurements The numbers that matter, and how you chose them.	
What went wrong, what I changed Every problem, and what you did about it. "Nothing" is almost never true.	
HS required, MS bonus The two features you added, or the problem you fixed.	

Screenshots and photos

My design A Tinkercad screenshot of Print 2, then one sentence on how you built it.	
The prints Slicer screenshots for both prints (PreForm or MakerBot Print), which printer, and print times.	
Photos Print 1 and Print 2, finished.
