

RoboMaster Competition

Grading Rubric · 100 points · 70 group / 30 individual

Group · 70 points

What your crew produces together.

Category	Pts	What I'm looking for
Research and proposal	10	Three real robot competitions researched, your game proposed and claimed.
Game Design Document	30	All six required fields, final version, complete enough that another crew could run your game without asking you anything.
Playtesting	15	Two playtests with people outside your crew, at least one rule changed because of what happened.
Running it live	15	Your field is set up, you referee, you keep score, you finish on time.

Individual · 30 points

What you personally did, separate from what your crew did.

Category	Pts	What I'm looking for
Your lead role	15	The three things your role owes, five points each. See the role rubrics below.
You drove	5	A completed clean driver run in at least one live match.
You shipped code	10	Code you wrote runs on a robot. Blocks are fine. If your crew's own game has no code in it, this is your part of the autonomous entry every crew already owes.

Winning any match is worth zero points. Placement earns bragging rights, not grade points.

Middle School crews of three double up two roles. The crew decides which two combine and says so in the Game Design Document. A doubled-up student is graded on the stronger of the two role scores, not the average.

RoboMaster Competition

Grading Rubric · 100 points · 70 group / 30 individual

The Four Lead Roles · 15 points each

Part of your Individual score above. Everyone participates in everything; your lead role is the one area you personally own and are graded on directly.

Pilot		<i>owns driving</i>	15 pts
Clinic	5	Every crew member completes a clean driver run because you ran the clinic.	
Drove live	5	You drive in at least one live match, Stage 2 or Stage 3.	
Briefing	5	You give the safety briefing before every match your game runs.	

Programmer		<i>owns the code</i>	15 pts
Runs hands off	5	Your crew's Open Events entry runs start to finish with nobody touching the controls.	
Tuned it	5	Tuned at least twice, and you can say what you changed and what happened.	
Taught the crew	5	Every crew member has code of their own that runs, because you taught them.	

Engineer		<i>owns hardware and field</i>	15 pts
Field built	5	Your game's field is built and sets up in under ten minutes.	
Pre match check	5	A written pre match check exists and gets used every time.	
Ready on call	5	Batteries, armor, and beads are ready whenever your crew is called.	

Media and Rules		<i>owns the document</i>	15 pts
Rules hold up	5	The rules and penalties section is written and holds up in play.	
Referee script	5	Written so a substitute could run your game cold.	
Recap published	5	Photos or film, plus a short write-up.
